Read the passage and answer the questions given below

Spitting to Survive by Liana Mahoney

Spit keeps our mouths moist and softens our food when we chew. Without spit in our mouths, we would have a hard time talking. We would find it even harder to swallow. But for some animals, spit works better after it has left the mouth. Some animals are experts at surviving because they are expert spitters.

Llamas are animals often found in petting zoos and farms. These animals seem to like their personal space. A llama that feels threatened or annoyed will spit slimy gobs at you to get you to leave it alone.

Sometimes llamas even spit on each other to steal food! This trick usually works, because llama spit includes food from the llama’s stomach, and it can be quite smelly. When a llama spits on another animal, the animal usually loses its appetite and walks away, leaving its food behind.

The archer fish is a very skilled spitter. This fish is like a submarine with a loaded weapon. It takes aim and spits jets of water at insects and other small creatures to knock them into the water. Then it gulps them down quickly. To create such a forceful stream of water, an archer fish closes its gills, and uses its tongue to form a tube in its mouth. Then the fish sticks its snout out of the water and aims. Aim! Launch! Lunch!

Spitting cobras are also known for their expert aim. These snakes spray poisonous venom from their fangs to protect themselves. Scientists believe that these snakes actually aim for the eyes! When the cobra’s venom gets into the eyes of an animal, the venom causes terrible pain, and even blindness. This gives the snake plenty of time to get away.

Spitting is considered to be rude behavior in people. But for some animals, spitting can be a smart way to get lunch –or a clever way to avoid becoming lunch!

NASA's Stardust Review

In the wee hours of January 15 2006, stargazers caught a glimpse of an intergalactic treasure chest blazing through Earth's atmosphere. The space capsule plunged to the ground at a speed of about 28,800 miles per hour. Its fiery dive lit up the sky in the western United States. When the container landed safely in the Utah desert, excited scientists from NASA burst into applause. *Stardust*, which captured comet dust and space particles, recently completed a 2.9-billion-mile journey. The probe spent seven years exploring space and collecting particles that may hold clues to the solar system's origins.

"We visited a comet, grabbed a piece of it, and [the capsule] landed here," Donald Brownlee, an astronomy professor and the mission's head investigator, told reporters. "It's an incredible thrill." *Stardust's* cargo contains more than a million particles. Most of the particles are less than 1/10 the width of a human hair. Scientists could spend decades studying the tiny fragments.

Astronomers had been counting down the days until the container's arrival. *Stardust* was launched on Feb. 7, 1999. Five years later, the probe streaked through a comet, collecting dust along the way. A comet is a heavenly body made up of ice and dust that often develops a long, cloudy tail of dust when it is near the sun. Many scientists believe that comets are leftovers from the formation of the sun and planets about 4.6 billion years ago. Researchers hope that the dust will provide clues to how the solar system was created. It may also help scientists understand how certain materials combined to form life.

"*Stardust* could provide a new window into the distant past," astronomer Simon Green told reporters.

Comprehension Questions:

1. How many years did *Stardust* spend exploring space?
 - A. two
 - B. five
 - C. seven
 - D. eight

2. All of the following were effects of the space capsule's return to Earth EXCEPT
- A. excited scientists from NASA burst into applause
 - B. the space capsule lit up the sky and landed safely
 - C. the cargo onboard the capsule caught on fire
 - D. the capsule landed safely in the Utah desert
3. Why does the author refer to the space capsule as an "intergalactic treasure chest"?
- A. It contains valuable information about space.
 - B. It is filled with coins and bills from around the world.
 - C. It holds treasures from each planet in our solar system.
 - D. It was designed to be in the shape of a treasure chest.
4. Read this sentence from the passage: "Scientists could spend decades studying the tiny fragments."
- In this sentence, the word **fragments** means
- A. collections of information
 - B. fruits that are overripe
 - C. long, cloudy tails of dust
 - D. parts that are broken off
5. Which statement best describes the main idea of this passage?
- A. A comet is a heavenly body made up of ice and dust that often forms a tail.
 - B. A space probe's cargo may hold clues to the solar system's origins.
 - C. *Stardust* plunged to the ground at a speed of about 28,800 miles per hour.
 - D. Scientists may spend the next few decades studying tiny particles of dust.
6. Which of the following is an opinion?
- A. Its fiery dive lit up the sky.
 - B. Finding out about comets is thrilling.
 - C. *Stardust's* cargo had more than a million particles.
 - D. *Stardust* grabbed a piece of the comet's tail.
7. What does Simon Green mean when he says, "*Stardust* could provide a new window into the distant past"?
- A. *Stardust* can give scientists information about American history.
 - B. The windows in *Stardust* provide a view of distant space.
 - C. The dust picked up by *Stardust* could give clues about the origin of the solar system.
 - D. *Stardust* may be able to be used as a time-machine.

8. Which of the following is true about comets?

- A. Comets are made from ice.
- B. Comets are made from dust.
- C. Comets can have long dusty tails.
- D. All of the above.

9. An example of an opinion is:

- A. The scientists burst into applause.
- B. Most of the particles are less than the width of a human hair.
- C. It may help scientists understand how life was formed.
- D. *Stardust* was launched on Feb. 7, 1999

10. "Many scientists believe that comets are leftovers from the formation of the sun". Is this sentence a fact or an opinion? Explain.

Topics could include eating manners, dress, attendance at weddings and funerals, dating, giving and receiving gifts, etc. Share an experience where you or someone you know unintentionally did something inappropriate in another culture.

Return of the Cube

Twenty-five years ago, the Rubik's Cube puzzled people of all ages. They spent hours twisting and turning the movable pieces of the cubed-shaped puzzle so that each side was just one color. Some could solve the puzzle in seconds. Many could not solve it at all.

In 2005, the cube enjoyed a revival as a new generation of "cubers" traveled the country taking part in highly competitive tournaments.

"It's very

addictive, and it spreads like a virus," Tyson Mao, 20, told the *San Francisco*

Chronicle. "One person will learn it, get hooked, and then teach others."

Mao is part of the Rubik's Cube Club from the California Institute of Technology. The college has sponsored six tournaments in California since January 2004. Mao and about 40 others competed at the International Rubik's Cube Tournament in San Francisco. The tournaments usually consist of several events, including those in which cubers compete using one hand. In one difficult event, the competitors first look at the puzzle and then try to solve it while wearing a blindfold. In another event, they try to complete the cube in the fewest moves.

Fourteen-year-old Shotaro Makisumi broke his blindfolded record with a time of 2 minutes 57 seconds. Many of those at the San Francisco tournament weren't even born when Erno Rubik first came up with the idea for the cube in 1974.

Today's cubers have also found a home on the Internet, where they swap ideas that can shave seconds off their time. The company that makes the cube has sold more than 100 million since the puzzle made its debut in 1980.

Comprehension questions:

1. “It’s very addictive, and it spreads like a virus” is another way of saying
 - a. people begin to think they can’t live without it, and its popularity spreads quickly from person to person.
 - b. “one person will learn it, get hooked, and then teach others.”
 - c. people love it and quickly get others to love it too.
 - d. all of the above.

2. The phrase “shaving seconds off their time” refers to
 - a. finding more time to spend on the cube as a hobby.
 - b. completing the puzzle more quickly.
 - c. spending less time at cube tournaments.
 - d. spending more time doing activities other than solving the puzzle.

3. Which of the following is *not* an event at the tournament?
 - a. People compete to solve the cube puzzle while blindfolded.
 - b. People use only one hand to solve the cube puzzle.
 - c. People try to solve the cube puzzle in the fewest moves.
 - d. People solve the cube puzzle while standing on their heads.

4. How do “cubers” use the Internet to solve the cube puzzle?
 - a. They exchange ideas about how to solve the puzzle faster.
 - b. They solve the puzzle online using an Internet version of the cube.
 - c. They research the history of the puzzle.
 - d. They plan social events.

5. Explain what “the Rubik’s cube puzzled people of all ages” means.

Interpret the following sentences with figurative language:

1. Brian was a wall, bouncing every tennis ball back over the net.

2. Cindy was such a mule. We couldn't get her to change her mind.

3. The skies of his future began to darken.

4. My brother was boiling mad.

5. The assignment was a breeze.

Surprise Encounter

Grady slung his backpack over his shoulder and slammed the door of the car shut.

“This is going to be a really long week,” he said to no one in particular. He looked around at the campground. Blue-green fir trees, some as tall as church spires, covered the mountainside. It was nearly 8:30. The sun would be setting soon. Then, Grady thought, maybe the heat wouldn’t feel like a coat. Even up here in the mountains, the hot stickiness of July clung to him.

Grady hated camping, but it was something his family insisted on every summer. His father liked cooking over an open fire, telling stories about how to survive things like bear attacks and swarms of bees. His mother and Jared liked to hike and take pictures of animals. Jared was his seven-year-old brother. He had a collection of bug pictures that he’d taped to the walls in his half of their room. *Bugs on leaves, bugs on tree trunks, bugs crawling in dirt.* Grady thought they were just plain creepy and considered them proof that Jared was weird.

They set up camp--two tents, one for his parents and one for himself and Jared. While everyone else got busy setting out cooking tools, Grady set off to check out the nearby stream. It was supposed to be deep enough to swim in a few places. As he neared the stream, something caught his eye. There was an adorable black bear cub—a small creature, no more than two feet tall.

It seemed to be playing at the edge of the water. Grady moved closer to get a better look. Then Grady heard a rustling behind him. He remembered that the cub could not be alone. He looked up and saw its mother . . .

Comprehension Questions:

1. What does Grady's brother collect?
 - A. bug pictures
 - B. baseball cards
 - C. stuffed animals
 - D. bearskin rugs

2. Grady goes to a nearby stream and encounters a black bear cub and its mother. What caused Grady to go to the stream?
 - A. He was trying to find his mother and younger brother.
 - B. He was checking to see whether he could go for a swim.
 - C. He wanted to see whether anyone was catching fish there.
 - D. He hoped that he would spot some frogs and insects.

3. What can you conclude about Grady at the end of the story?
 - A. He will go closer to the cub.
 - B. He will have a nice swim.
 - C. He is safe near the cub.
 - D. He is in serious danger.

4. Read this sentence from the passage: "Blue-green fir trees, some as tall as church spires, covered the mountainside."
In this sentence, the word **spires** means
 - A. amazing sights
 - B. pointed roofs
 - C. building floors
 - D. hard surfaces

5. The main purpose of this passage is to describe
 - A. what Grady likes to do in his spare time
 - B. what happens when Grady goes camping
 - C. why Grady's father likes cooking over an open fire
 - D. how camping is a fun activity for families to do together

6. An action that leads to the problem in the story is
 - A. Grady slams the car door shut.
 - B. Jared likes to hike and take pictures.
 - C. Grady sees an adorable black bear cub.
 - D. Grady thinks that bugs are creepy.

7. What is the main problem in the story?
 - A. Jared likes bugs but Grady does not.
 - B. Grady does not like to go camping.
 - C. The mountain air was hot and sticky.
 - D. Grady encounters a mother bear that will want to protect her cub.

With a partner, describe an experience, good or bad, that you have had at an airport or on an airplane. What happened? What did you learn about the experience that will help you the next time you travel?

The Stonecutter

Once upon a time there was a stone cutter. The stone cutter lived in a land where a life of privilege meant being powerful. Looking at his life he decided that he was unsatisfied with the way things were and so he set out to become the most powerful thing in the land.

Looking around his land he wondered to himself what it is to be powerful. Looking up he saw the Sun shining down on all the land. "The Sun must be the most powerful thing that there is, for it shines down on all things and all things grow from its touch." So he became the Sun.

Days later, as he shone his power down on the inhabitants of the land, there came a cloud which passed beneath him obstructing his brilliance.

Frustrated he realized that the Sun was not the most powerful thing in the land, if a simple cloud could interrupt his greatness. So he became a cloud, in fact, he became the most powerful storm that the world had ever seen.

And so he blew his rain and lightning, and resounded with thunder all over the land, demonstrating that he was the most powerful. Until one day he came across a boulder.

Down and down he poured and his thunder roared, lightning flashed and filled the sky, striking the ground near the boulder. His winds blew and blew and blew, and yet, despite all his efforts, he could not budge the boulder.

Frustrated again, he realized that the storm was not the most powerful thing in the land, rather it must be the boulder. So he became the boulder.

For days he sat, unmovable, and impassive, demonstrating his power, until one day, a stone cutter came and chiseled him to bits.

What is the moral of the story?

Activity 1

Decide if the following 15 statements about the story are true or false.

- _____ 1. Where the stone cutter lived, those advantaged because of their position or because they were rich were those with the ability to control people and events.
- _____ 2. The stone cutter was unhappy because he did not have what he wanted.
- _____ 3. The stone cutter decided that the sun was the most powerful thing in the land because it was so shiny.
- _____ 4. The stone cutter could turn into different things.
- _____ 5. The cloud prevented the sun from demonstrating its intelligence.
- _____ 6. The stone cutter believed that a cloud was more powerful than the sun.
- _____ 7. Never before had the world witnessed such a storm.
- _____ 8. The storm lasted for less than a day.
- _____ 9. The storm hit the boulder with lightning.
- _____ 10. The storm attempted to move the boulder.
- _____ 11. The storm felt annoyed and discouraged because it could not achieve what it wanted.
- _____ 12. The boulder showed how powerful it was by not moving.
- _____ 13. The stone cutter used a tool to destroy the boulder.
- _____ 14. According to the moral of the story, you sometimes have everything you need already, right inside of you.
- _____ 15. According to the moral of the story, power is something that is not really what **it** seems to be.

(Play again the recording and let the students complete the dialogue.)

Stuart: Amy. So, how are you doing?

Amy: Oh, hi Stuart. _____ is so crazy these days, and when I'm not at school, I'm at work.

Stuart: Hey, listen. I'm getting together with Sara and Paul _____ and a few of our other friends are going to join us. [Oh.] And, we're . . . well, we're going out to eat and then catch _____. Why don't you come with us?

Amy: Hey, I'd love to, but I have to cram for a test _____.

Stuart: Ah, come on. We're _____ on having dinner around 6:30 and then seeing a movie at 7:30. We should be home by _____ . . . 11:30 at the latest. I mean you're always saying that you don't have any friends . . . and that your love life . . . well, that you don't have one. Come on!

Amy: I . . . I don't think I'd better. I haven't been _____ well lately.

Stuart: Yeah, because you study too much. Well, we'll have _____. Come on! Relax. [Well . . .] And it's Sara's birthday, too. And we're throwing her a small birthday party after the movie. Come on. Best friends always stick _____

Amy: Oh. Okay.

Stuart: Great. I'll pick you up at 6:00.

Amy: Okay. See you then, but I have to be back by 10:30.

Stuart: Ah, 10:30 . . . _____. It's all the same. See you at 6:00.

Speaking Activity

Imagine that you want to get together with a few new friends from out of town next weekend. What two or three leisure or recreational activities would you consider doing to introduce your friends to your city? Use the Internet to plan your day and look up the cost, operating hours, and location of each activity you plan. Discuss your results.

A Tricky Move

If you think moving a piano is tricky, try moving the 2,080-pound Liberty Bell. The bell, one of America's most enduring symbols of freedom, had to be moved from its second home at Liberty Hall Pavilion in Philadelphia to a new building down the street.

Why the change of address? The National Park Service built a new center for the Liberty Bell. Movers wanted to

make sure that no additional harm was

done to the bell's famous crack. During the move, scientists attached tiny **sensors** to the mostly copper bell. The sensors would sound an alarm if the bell's famous crack got bigger. "The bell is fragile because of the way it was [made]," said one scientist.

This wasn't the first time the Liberty Bell was moved. From 1885 to 1915, the Liberty Bell traveled across the country, visiting more than 400 cities and towns, including Chicago, New Orleans, and St. Louis.

Workers also moved the Liberty Bell in 1976, when it was taken from Independence Hall to the Liberty Hall Pavilion.

The Liberty Bell no longer rings today. During the move, wireless technology attached to the bell.

Comprehension Questions:

 - d. all of the above.

3. We can assume that if the sensors had sounded an alarm during the moving of the Liberty Bell,
 - a. the bell would have broken in two.
 - b. the movers would have checked the bell's condition.
 - c. the bell would have been moved to a different place.
 - d. the bell would have to be replaced.

4. The reason the bell traveled for 30 years all across the U.S. was
 - a. to keep it from being destroyed.
 - b. to repair its large crack.
 - c. to inspire pride and patriotism.
 - d. to earn money for its upkeep.

5. The National Park Service built a new center for the Liberty Bell. The problem was that workers had to make sure that the bell's crack was not harmed during the move. How was that problem solved?
 - a. Workers wrapped the bell in many layers of bubble wrap and tissue paper.
 - b. The bell was carefully taken apart before the move and then put back together again.
 - c. Sensors were attached to the bell and would sound an alarm if the crack got bigger.
